# DISCOVER THE POWER OF TRANSLATING SCIENCE INTO POLICY

Funded by  
the European Union

Funded by the European Union. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union or European Health and Digital Executive Agency (HADEA). Neither the European Union nor the granting authority can be held responsible for them.

PLANETARY  
Health Cluster

PLANET4HEALTH is one of five Horizon Europe projects—GoGreen Next, MOSAIC, PLANET4HEALTH, SPRINGS, and TULIP—that together form the Planetary Health Cluster.

## Translating science into policy

PLANET4HEALTH is the Horizon Europe Health RIA project, named “Translating Science into Policy: A Multisectoral Approach to Adaptation and Mitigation of Adverse Effects of Vector-Borne Diseases, Environmental Pollution and Climate Change on Planetary Health” funded by the European Union.

## What is our mission?

Provide new knowledge and tools addressing environmental degradation’s impacts on human, animal & ecosystem health. PLANET4HEALTH aims to support policy making processes and raise citizens awareness about sustainable planetary health, climate & environmental policies, and adaptation and mitigation strategies to natural hazards.

# WHAT ARE THE MAIN GOALS?

## Interdisciplinary Collaboration

Promoting cross-sectoral collaboration to address complex planetary health issues.

## Community Engagement & Raising Awareness

Engaging stakeholders to raise awareness and promote action on environmental issues.

## Tools & Strategies

Developing innovative tools & strategies for sustainable planetary health.

PLANET4HEALTH conducts research and looks to draw overarching conclusions **from four tailor-made case studies** focusing on pivotal areas:

## Working **together** for a healthier planet

**PLANETARY**  
Health Cluster

PLANET4HEALTH is one of five Horizon Europe projects - GoGreen Next, MOSAIC, PLANET4HEALTH, SPRINGS and TULIP - that together form the Planetary Health Cluster.

Our collective mission is to address the impacts of human disruptions to Earth's natural systems on human health and all life on Earth, and to promote evidence-based policy to support global Planetary Health.

## Who are we?

A diverse network of experts in environmental science, public health, engineering, policy, and communication.

## What is our mission?

To develop solid knowledge and tools to understand the interaction between natural systems and human health.

## Who are we looking for?
